

RIGHT PATIENT. RIGHT RECORD. EVERY TIME.

Lenovo Authoritative Identity
Management Exchange (AIMe)
Powered by LifeMed ID

*A Proven Patient Identity Solution
Across Different Settings of Care*

Health

Lenovo™

Medical identity inaccuracy continues to plague healthcare.

Hospitals are continuously investing dollars into reconciling duplicate, misfiled and/or inaccurate medical records (and trying to prevent HIPAA violations). Not only are they struggling with the impact of identity errors on budgets and compliance but, more importantly, on patient lives.

Lenovo® Health and LifeMed ID™ have partnered to revolutionize patient identity and security while automating patient processing, intake and payment workflow processes, helping reduce the risk of medical identity inaccuracies and preventable medical errors.

DUPLICATE RECORDS

ACCOUNT FOR 15% OF ALL PATIENT RECORDS.²

OVER 2 MILLION Americans suffered

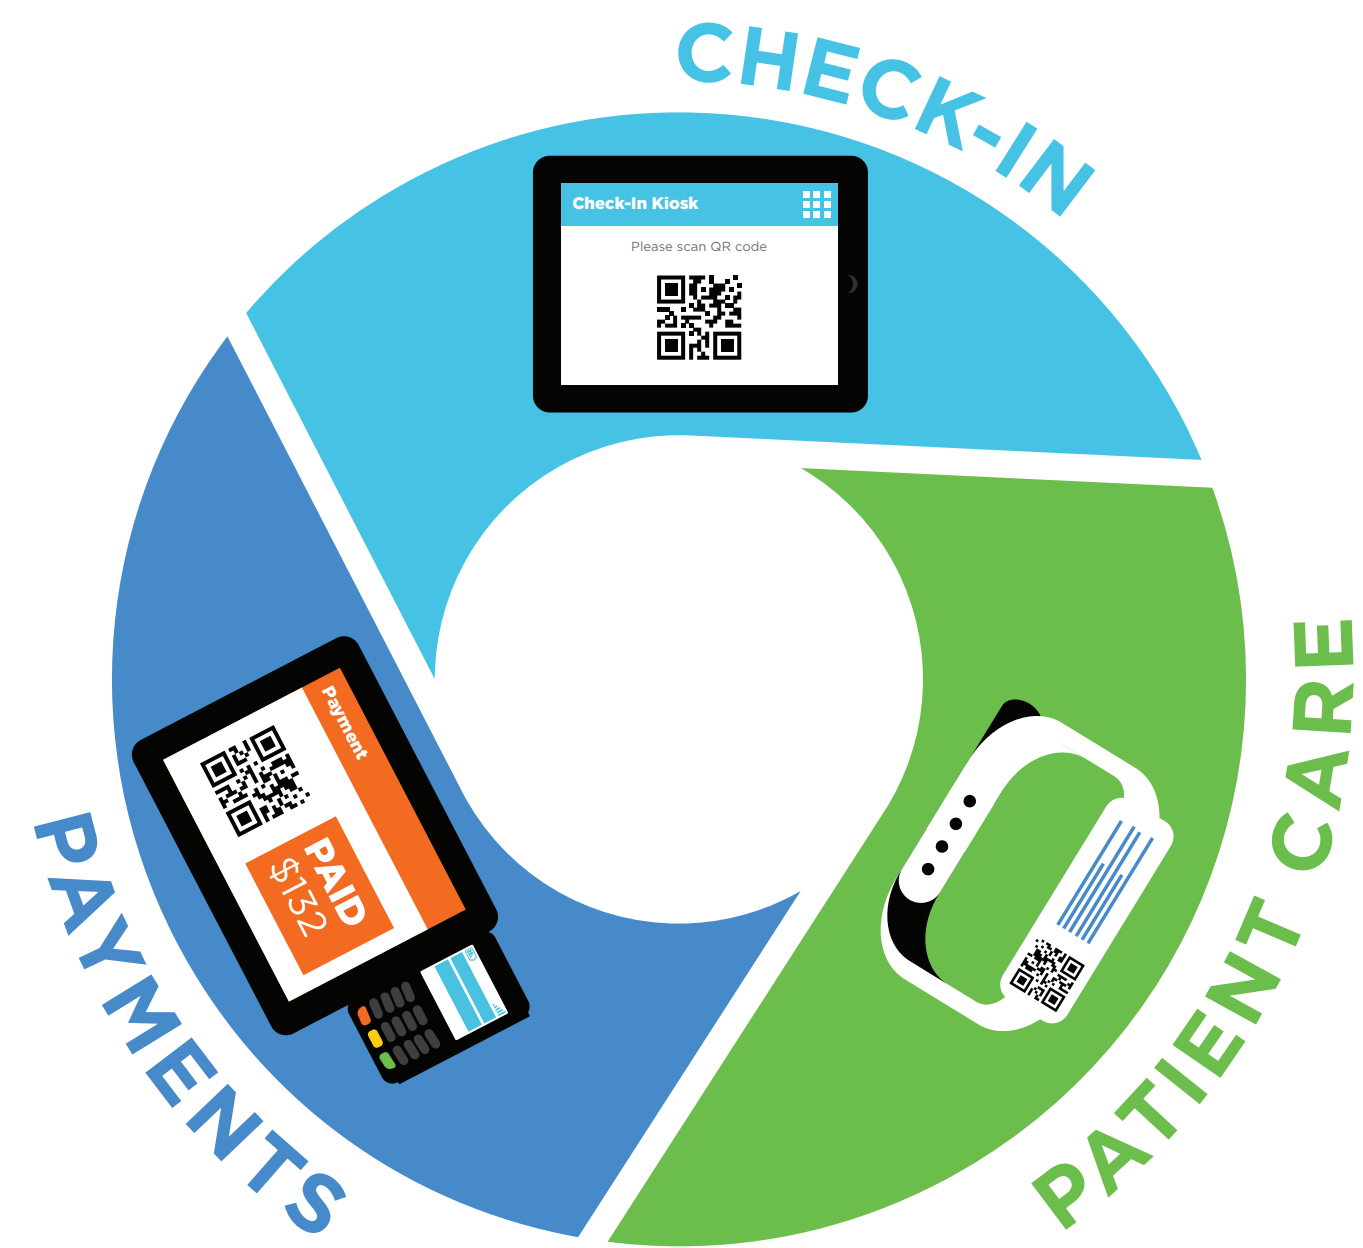

medical identity theft last year,

Preventable medical errors persist as the number 3 killer in the U.S.—

third only to heart disease and cancer—claiming the lives of some 400,000

Promote a safe, secure and seamless patient experience.

*Available in future release

Patients can
**move easily through
care settings at
multiple locations**
while automatically
matched to their
correct medical record.

Lenovo Authoritative Identity Management Exchange (AIME) powered by LifeMed ID helps providers:

- Validate and permanently match patients with their correct medical records
- Bridge a single patient ID at all points of care and across the care continuum
- Expedite administrative workflow by automating patient processing starting with check-in
- Improve patient satisfaction and safety while increasing data and billing accuracy
- Decrease patient processing time, data entry errors and administration costs
- Eliminate duplicate patient records that can lead to medical inaccuracy

AIME Powered by LifeMed ID

Patient Processing

To learn more, contact your
Lenovo Health Account
Representative or visit us at
lenovohealth.com/patient-ID

1. Patient scans a QR code from a mobile device app on a ThinkPad Tablet 10 and provides a PIN code as a 2nd factor authentication

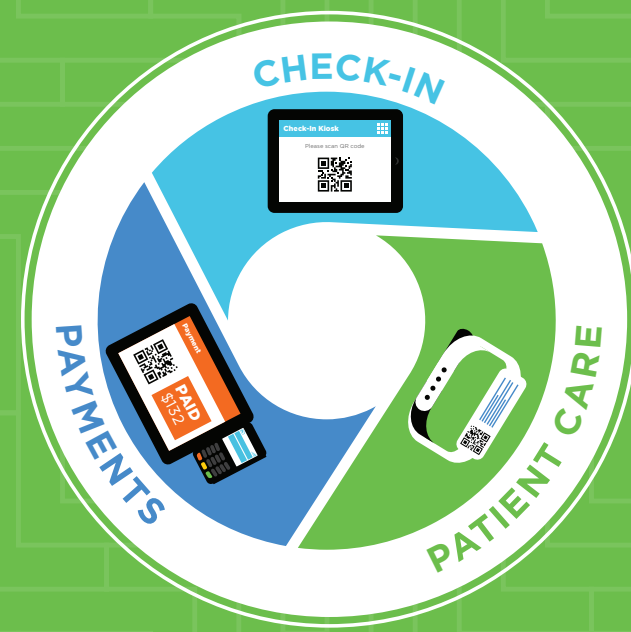

2. Instantly and accurately verifies patient's identity, address and insurance eligibility as part of the check-in process

3. Invokes patient's record/ EHR on a provider-facing Lenovo ThinkCentre® M900 with Tiny-in-One 23 in less than 60 seconds

AIME powered by LifeMed ID is the only patient ID solution provider to offer optional biometric 2-factor authentication that can accommodate and utilize various token modalities such as a smartphone or credit card to correctly and securely identify and match a patient to his/her medical chart.

AI Me Powered by LifeMed ID **Patient Care**

To learn more, contact your
Lenovo Health Account
Representative or visit us at
lenovohealth.com/patient-ID

1. Once a patient's ID token is provided, registrars have the ability to help assure positive patient ID throughout the various levels of patient care

2. Registrar instantly prints a wristband from the same screen used to verify patient information on the ThinkCentre® M900 with Tiny-in-One 23

3. Enables adherence to Five Rights by providing the ability to positively ID patients and access their correct medical record

FIVE RIGHTS: the right patient, the right drug, the right dose, the right route, and the right time.
